This digital camcorder will record video and still photography.

3 camcorders
3 complete cord set

Mimio Full Set (4)

Make any classroom interactive

With mimio Interactive you can convert your existing whiteboard into a powerful interactive teaching tool. Use ergonomic mimio Mouse as a cordless mouse to control (click, right click, drag and drop) computer applications and documents directly from the whiteboard.

- Control PowerPoint slides, Word documents, Excel spreadsheets
- Annotate, mark-up, and edit slides or screens directly at the board
- Browse educational websites on the Internet
- Navigate interactive instructional CDs

Capture your whiteboard notes ... and your students' attention

With mimio Capture attached to your whiteboard and Expo™ dry-erase markers inserted into the mimio stylus pens, everything that you write or draw is digitally recorded - in color and real time - so that they can be saved and shared with students, parents and colleagues. Notes can be:

- Printed ... for students with IEPs that require them.
- Emailed ... to absent students.
- Posted on the web ... accessible by students and parents.
- Copied and pasted ... and incorporated into other applications.

Teachers can distribute and archive class notes while students focus on understanding the lessons presented instead of copying the board.

Please Note:

Some equipment requires that teachers receive training prior to check out. Please email Instructional Technology at it@burlesonisd.net for more information, to schedule training, or to check out equipment.
