

## **Fly-In Text**

Used sparingly, having text fly in raises the attention of your viewers. You can choose to include Fly-in Text from the Header Tab under Global Elements. You will have to scroll down to the bottom of the Header edit screen as it is near the bottom. Check the box for Include Fly-in Text. You have the ability here to enter a line of text that will fly in from the left of your screen below your header.

<input checked="" type="checkbox"/> Include Fly-In Text	Welcome to the new school year. Time to buckle down to work.....
---	--

The Fly-in text will appear each time the page is loaded. It will Fly-in from the left just above the left side navigation area.
